
I2of5/Interleaved 2 of 5	Bar code type/symbology currently used by Foot Locker for retail product identification.
ASN	Advanced Shipment Notification. An ASN is information about a shipment, sent by suppliers before the shipment arrives, which allows the service centre to plan for the shipment receipt. ASN's are generally sent electronically or via facsimile. ASN information usually includes: date and time of shipment arrival, PO numbers, vendor, SKU number, quantities etc.
Bar Code	A series of vertical bars and spaces containing coded information. Bar codes may represent letters, numbers or an alpha/numeric combination. Bar codes are designed to be read electronically, such as with a bar code scanner or laser scanner.
Bar Code Reader	An electronic device used to recognise and decipher information encoded in bar code labels.
Bin	A SKU item that is at the style/colour/size level. (Each item is a retail unit e.g. a red shirt size small).
BOL	Bill of Lading. Document produced during shipping, at the store, order, or trailer level, which tells exactly what is being shipped to a store on a particular trailer.
Carton Audit	Checking the contents of a carton to double check and ensure order filling accuracy.
Caselot	Carton or polybag containing a variety of sizes and retail units of the same item. Also known as a musical run. <u>Multi-Sized Items:</u> Packed in a musical size run (as opposed to solid by size). A caselot is a "pick unit". Example: a 12 pair caselot of footwear consisting of 2-8's, 3-9's, 3-10's, 2-11's and 2-12's. <u>One-size Items (usually accessories):</u> Packed in multiples. A caselot is a "pick unit". Example: a 12 pair/unit package of socks or a 12 unit carton of shoe care product = 12 size 990's (size 990 = a one-size item).
Caselot Size Schedule Number	A five (5) digit number (distinct) used to identify a specific caselot musical run or packing quantity. This number is unique by retail division.
Case Pick	Picking a full case of an item for shipment and placing it on the outbound conveyor.
Claim	Action taken against a carrier, vendor, or individual for new delivery at Service Centres. (Claims may be

	initiated returns by stores where a customer is dissatisfied and/or product is found to be defective.)
Cross Dock	Receiving and shipping product from the service centre without putting it into storage.
Division	Merchandising divisions with Foot Locker. Example: Division 24 is Australia, Division 28 is New Zealand.
Dock	Locations in service centre receiving and shipping area where freight is unloaded, loaded or stacked until putaway in the service centre or loaded on a trailer.
Inner Carton	A polybag, box or bundle (which contains product packed in multiples), placed inside a master (outer) carton.
Manifest	A shipping document used to identify and control product shipped from the service centre which details the contents of the shipment.
Master BOL	Master Bill of Lading. A bill of lading describing the contents of the entire trailer, which may include information from stop and/or other bills of lading.
Master Carton	Also referred to as “outer carton”. The outermost carton of packaging. The carton in which the product is shipped to our final destination (as opposed to inner cartons).
Master Shipment	One or more pre-planned warehouse order, grouped into one or more shipments that are shipped together on a single trailer.
Masterpack	Carton received that contains more than one warehouse pack or shipping unit inside of it that may be picked and shipped in its entirety. Masterpacks are very common with items such as socks.
Multi-Pack	A SKU item that is a pre-pack but has a case quantity greater than one. (e.g. one case with multiple polybags that each contain 2 red shirts size small, 3 red shirts size medium and 2 red shirts size large.) Packaging would be polybags (or small cartons) within a master carton.
Musical Run	An assortment (usually a run) of sizes. See “Caselot”
Non-Conveyable	Freight because of it’s size or weight, that cannot be sent through the conveyor system.
Order Filling	Picking merchandise from pick faces based on orders for shipments to customers.

Over, Short & Damaged	(OS&D) A report generated within the service centre for a receipt that lists any overages, shortages or damage discovered during the receiving process.
PO	Purchase Order. PO's are created by buyers and sent to vendors to request merchandise to be sent to a specific location (i.e. the service centre or store). Information on a PO includes item number, quantity, price, vendor information etc. PO's are also used by the service centre during receipt to ensure that the item and quantity received match what was ordered.
Packing List	A list prepared by the vendor by purchase order, detailing the items shipped by style, the number of cases shipped and how it was packed.
Pick Unit	The level at which a service centre picks the product to be shipped to stores (i.e. a caselot/musical run of footwear in one master carton, a pair (box) of footwear, a caselot of cans of shoe polish).
Parcel Shipment	Orders shipped via a parcel or small package carrier such as UPS.
Piece Pick	Picking items where each retail unit is one pick unit. Also known as Bin Stock.
Retail Unit	The level at which the product is sold to the consumer (i.e. a pair (box) of footwear, a can of shoe polish).
Season Code	3 digit numeric code derived from Year and Month of expected delivery. YMM eg July 09 delivery - 907
Service Centre	A central receiving and shipping point, which holds stock for shipments to stores based on demand and merchandising. Emphasis in a service centre is placed on the flow of products through the facility, with minimal storage of products.
SKU	Stock Keeping Unit – 13 digit number assigned to product by Foot Locker. Department (2 digits)-Stock Number (5 digits)-Check Digit (1 digit)-Width/Colour (2 digits)-Size (3 digits). Example: 93-51045-9-00-105
Store Ready	Merchandise received in accordance with Foot Locker Vendor Standards Manual.
UCC-128	A case license plate bar code that provides a unique identification number on a carton shipping label.
UPC	Universal Product Code. A bar code technique and symbology used for retail product identification.
