

Foot Locker monitors all sales electronically through Point of Sale. This allows us to track how your merchandise is selling, but only if each piece is accurately ticketed.

It is the requirement of Foot Locker to have each vendor pre-ticket all merchandise.

Foot Locker, Inc. utilizes three different types of automatic data capture bar code symbologies for our price tickets, caselot labels and outer carton labels. These symbologies are UPC-A , Interleaved 2 of 5 and Code-128.

- **For all Divisions, product should be ticketed with UPC-A (EAN)**

Not on all Ticket Types:

- Item description (as applicable/shown in the examples to follow): this is either a one or two line field of up to 17 characters per line
- Alpha size in human readable form (i.e., small, large) – as shown on the following pages.

Page 3-3 displays the caselot sticker required on caselot and multi-pack packaging.

Special Note:
All barcodes must meet ANSI/CEN/ISO print quality requirements of A or B.
In addition, all barcode heights must be a minimum of 12mm including indentations.

Apparel/Accessory Hang Tag
Foot Locker Ticket type #U62
Size 1 1/2" X 2 3/4"

ALPHA SIZE
 THIS FIELD IS AN ENGLISH/ALPHA
 DESCRIPTION (SML, MED, LRG,
 ETC.)

Size 3" X 7/8"

CASELOT 5 DIGIT SIZE SCHEDULE
 NUMBER.

Note: The 15 digit SKU number consists of two-digit department, five-digit stock number, one-digit check digit, two-digit width code and five digit caselot size schedule, which can be found on your purchase order.

Barcode Print Quality Requirements

The quality of a printed bar code sent to Foot Locker, Inc. should be such that our scanning equipment can read the symbol for the first time and every time thereafter. Our requirements follow the recommended American National Standard Institute (ANSI)/ Committee for European Normalization (CEN)/ International Standards Organization (ISO) print quality grading system. This uses the grading system of A, B, C, D, or F, or 4, 3, 2, 1, or 0.

A = 4.0 for value range 3.5-4.0

B = 3.0 for value range 2.5-3.4

C = 2.0 for value range 1.5-2.4

D = 1.0 for value range 0.5-1.4

F = 0.0 less than 0.5

The graded parameters are symbol contrast (SC), modulation, defects and decodability.

Obtaining Tickets

Vendors may choose either of the following options to obtain tickets:

- You may obtain pre-printed tickets from Foot Locker's recommended third party ticket suppliers shown below:

Obtaining Tickets (cont.)

You may create your own tickets (as opposed to having them made for you by one of our recommended third party suppliers) or you may use your own third party supplier.

To obtain a copy of the Foot Locker *Ticket Specification Manual* you may call in your request to: (785) 761-3406

Please provide a complete company name, contact phone number and email address. A ticketing specification manual will be emailed to you within a few business days. This manual will supply you with more details (technical specifications) for all ticket types used by: Foot Locker, Footaction, Kids Foot Locker, Lady Foot Locker, Champs Sports, Foot Locker Canada and Champs Sports Canada

All tickets being produced by you will need to have the layout approved by Foot Locker as noted in the *Ticket Specification Manual*. Scan tests will be your responsibility and must meet Foot Locker specifications.

Obtaining Data Required for Tickets

Data elements necessary to order (or create tickets) may be obtained from one of two places as follows.

- For EDI Vendors (Receiving EDI 850 PO Adds Version 004010VICS from Foot Locker):
 - Foot Locker SKU (department, stock number, check digit, width/color; 2-5-1-2 = 10 positions) is located in the PO107 segment
 - UPC number is located in the PO115 data element
 - Vendor/manufacturer style number is located in the PO109 segment
 - Foot Locker purchase order number and retail division number (7-2 = 9 positions) are located in the BEG03 segment
 - Foot Locker purchase order date (by century, year, month, and day: 2-2-2-2 = 8 positions) is located in the DTM02 segment that corresponds to the DTM01) segment with “007” in it (The day will always equal “01”)
 - Other assorted shipping related dates are located in DTM02 segments that correspond to DTM01 segments with other codes in them (as applicable)
 - Foot Locker item descriptions are located in the first occurrence of the PID05 segment (maximum 34 characters)
 - Foot Locker retail price/ticket retail is located in the CTP03 segment when the CTP02 segment contains “RES”
 - Packing type (Bin/solid or caselot/musical run/multi-pack) is located in the PO116 element. If this element = “CG” then the sku for this order is to be packed as caselot. (If the element does not exist, then the order is to be packed solid)
 - Unit of measure (i.e., DZ = dozen, PR = pair & EA = each/unit) are located in the PO103 segment
 - The caselot size schedule number is located in the PO117 element when the PO116 element = “CG”
 - By size, units per case (only applies to caselot orders – where PO116 = “CG”) is located in the SLN segments. (All quantities from the SLN segments within the PO1 loop must be summed to attain the total units per case quantity)
 - Total number of cases for a specific SKU (only applies to caselot orders where the PO116 = “CG” is located in the PO102

Obtaining Data Required for Tickets (cont.)

- For EDI Vendors (Receiving EDI 850 PO Adds Version 004010VICS from Foot Locker): (cont.)
 - Total number of line items is located in the CTT01 segment
 - Shipping destinations located in the SDQ03, SDQ05 (SDQ07, SDQ09, etc.) segment(s)
 - Two digit numbers indicate a service center destination. These destinations are provided in appendix B of our EDI-850 Mapping Documentation.
 - Five digit numbers indicate a store location. The addresses that correspond to these store numbers are available via the EDI 816 transaction set, which we support.
 - Suggested retail price (“compare at” price) is located in the CTP03 segment when the CTP02 segment contains “MGR”

Other data elements included in a standard (version 4010) 850 transaction are: vendor number (5 digits numeric), FOB (free on board) point, PO payment terms, PO cancel date, requested ship date, end ship date & UPC (where applicable).

Caslot Size information

- Individual sizes are located in the SLN13 element. (If applicable, alpha sizes would be located in the SLN15 element).
- Individual size quantity for a case is located in the SLN04.
- Total units ordered for a specific PO/SKU may be calculated by adding up the following.
Total units = (PO102 *(sum of SLN04 quantity))

Bin Size Information

- Individual sizes are located in the PO111 elements (if applicable, alpha sizes would be located in the PO113 elements)
- Individual size quantities are located in the PO102.
- Total units ordered for a specific PO/SKU may be calculated by adding up the PO102 quantity.

Obtaining Data Required for Tickets (cont.)

-
- For EDI Vendors (Receiving EDI 850 PO Adds Version 004030VICS from Foot Locker):
 - Foot Locker SKU (department, stock number, check digit, width/color; 2-5-1-2 = 10 positions) is located in the PO107 segment
 - UPC number is located in the PO115 data element
 - Vendor/manufacturer style number is located in the PO109 segment
 - Foot Locker purchase order number and retail division number (7-2 = 9 positions) are located in the BEG03 segment
 - Foot Locker purchase order date (by century, year, month, and day: 2-2-2-2 = 8 positions) is located in the DTM02 segment that corresponds to the DTM01) segment with “007” in it (The day will always equal “01”)
Other assorted shipping related dates are located in DTM02 segments that correspond to DTM01 segments with other codes in them (as applicable)
 - Foot Locker item descriptions are located in the first occurrence of the PID05 segment (maximum 34 characters)
 - Foot Locker retail price/ticket retail is located in the CTP03 segment when the CTP02 segment contains “RTL”
 - Packing type (Bin/solid or caselot/musical run/multi-pack) is located in the PO118 element. If this element = “CG” then the sku for this order is to be packed as caselot. (If the element does not exist, then the order is to be packed solid)
 - Unit of measure (i.e., DZ = dozen, PR = pair & EA = each/unit) are located in the PO103 segment
 - The caselot size schedule number is located in the PO119 element when the PO118 element = “CG”
 - By size, units per case (only applies to caselot orders – where PO118 = “CG”) is located in the SLN segments. (All quantities from the SLN segments within the PO1 loop must be summed to attain the total units per case quantity)
 - Total number of cases for a specific SKU (only applies to caselot orders where the PO118 = “CG”) is located in the PO102

Obtaining Data Required for Tickets (cont.)

- For EDI Vendors (Receiving EDI 850 PO Adds Version 004030VICS from Foot Locker): (cont.)
 - Total number of line items is located in the CTT01 segment
 - Shipping destinations located in the SDQ03, SDQ05 (SDQ07, SDQ09, etc.) segment(s)
 - Two digit numbers indicate a service center destination. These destinations are provided in appendix B of our EDI-850 Mapping Documentation.
 - Five digit numbers indicate a store location. The addresses that correspond to these store numbers are available via the EDI 816 transaction set, which we support.
 - Suggested retail price (“compare at” price) is located in the CTP03 segment when the CTP02 segment contains “MSR”

Other data elements included in a standard (version 4030) 850 transaction are: vendor number (5 digits numeric), FOB (free on board) point, PO payment terms, PO cancel date, requested ship date, end ship date & UPC (where applicable).

Caslot Size information

- Individual sizes are located in the SLN14 element. (If applicable, alpha sizes would be located in the SLN16 element).
- Individual size quantity for a case is located in the SLN04.
- Total units ordered for a specific PO/SKU may be calculated by adding up the following.
Total units = (PO102 *(sum of SLN04 quantity))

Bin Size Information

- Individual sizes are located in the PO111 elements (if applicable, alpha sizes would be located in the PO113 elements)
- Individual size quantities are located in the PO102.
- Total units ordered for a specific PO/SKU may be calculated by adding up the PO102 quantity.

Mark-for Orders

- The warehouse ship to is located in the N104 segment and the mark-for destination is located in the SDQ03, SDQ05,(SDQ07, SDQ09, etc.) segment(s).

Obtaining Data Required for Tickets (cont.)

- For non-EDI vendors receiving our printed purchase order

Foot Locker UPC and Catalog Requirements

Foot Locker, like most retailers, is rapidly changing the way business is conducted. Our primary objective is to better serve our customers by utilizing technology to the fullest.

Our company is fully committed to the use of UPC (Universal Product Code). We expect all vendors to assign UPC numbers, mark all merchandise with UPC bar codes, utilize UPC on all EDI documents and maintain a third party catalog. Data integrity and quality assurance is critical to Foot Locker's ability to manage its business.

The following requirements apply to all footwear, apparel, and general merchandise product. This includes all of the UPC marking variations on all types of merchandise presentation including hanging, folded or packaged goods.

Foot Locker subscribes to SPS Commerce to receive vendor UPC
Vendors are required to provide access to their UPC's through this service
Your UPC catalog on SPS must contain at least the following information:

- UPC
- Product Identification, style, color, size, etc.
- Product Description

All products purchased by and shipped to Foot Locker must be ticketed with a quality scannable bar coded and human readable UPC number. UPC errors and the lack of bar code quality corrupt this capability.

The Uniform Code Council guidelines state that UPC's are to be retained for 30 months (for fashion merchandise) and 48 months (for basic merchandise) after the last activity before reassigning them to new styles, colors and sizes.

The technical specifications for the UPC symbol and number are defined in the UPC Symbol Specification Manual. The symbol specifications apply to all usage of the UPC to identify footwear, apparel, and general merchandise.

Footwear, apparel and general merchandise should be identified using UPC Version A.

Footwear, apparel and general merchandise should be identified at the lowest product variant level (size/color). Each unique size and color must have a different UPC number.

UPC is an item identification standard. Each merchandise item should be individually UPC symbol marked. Standard shipping assortments and other vendor/retailer pre-pack arrangements do not preclude item specific UPC marking requirements.

The UPC bar code symbol should be a minimum of 12mm in height.

The UPC bar code symbol may be proportionally reduced or increased in magnification. However, such reduction must never be less than 80% or increased greater than 120% of nominal size.

The UPC bar code symbol is to be printed with black bars on a white background. This will ensure that the symbol is scannable at the retail point-of-sale. If the symbol is printed on the packaging in other colors, they must strictly conform to the instructions in the UPC Symbol Specifications Manual.

The UPC numerals printed beneath the symbol should be .108” high at nominal size and are to be printed in the 1-5-5-1 format (i.e., 0 12345 67890 5). All twelve (12) of the UPC numerals must be printed including the check digit to enhance accuracy for key-entry purposes where the bar code is unscannable.

Tickets and tags are to be attached in a secure manner. This will ensure that the correct UPC symbol is associated with the product and the adhesive retail price stickers, which may be added, remain securely attached.

Particular attention should be given to the print quality of the UPC symbol. Scanning characteristics must be verified.

Contacts and Organizations

If you are not EDI capable and need to get started, we recommend you contact the following organizations:

UPC & EDI Standards GS1

EDI Help Line: 717-972-5979

Ticketing Placement Guidelines

To maintain consistency in tag and sticker placement, follow the guidelines below when ticketing all products:

- Do NOT cover any information including existing UPC's (For Canadian Divisions Only)

Affixing Adhesive Stickers

Shoe Box Stickers:

Stickers should be placed on the lower left or right-hand corner of one end of the box so as not to cover product information or UPC's. The sticker should not be applied to the box lid except in cases when the lid covers most or all of the box (overlay lid). Note: All 12 of 5 stickers should be placed on the same end of the box as the UPC. (For Canadian Divisions Only)

Socks:

Affix sticker on the back of the sock band for all banded socks (singles and multiple pairs). Affix case lot sticker in the center of the packaging for all multi-pack bundles.

Shoe Care Products:

Affix sticker on the side of the can (vertically if possible) or have barcode information imprinted on side of can. For small containers (i.e. shoe polish), the sticker may be on the bottom of the container when there is not sufficient room on the side.

Insoles:

Affix sticker on the back of the packaging or have information imprinted on back of packaging.

Hats:

Affix sticker on the underside of the bill of the hat. If no bill exists, then attach a hang tag through the inside tag or through a seam near the back. A separate bin label should be attached to the crown of the hat for fixed scanning.

Books:

Affix sticker on the lower right-hand corner in the back. Do NOT cover any existing information.

Boxed Accessories:

Affix stickers on the top center of the box.

Sports Equipment:

Sticker should be placed on the top center of the box so as not to cover product information.

Affixing Adhesive Stickers (cont.)

Skate Boards Affix sticker to the bottom of board.

Weights Sets Affix sticker to the small end of every box (multiple boxes = 1 set).

Affixing Hang Tags

Shirts, Tops & Jackets: Affix to the tag inside the collar (at back of neck).

Shorts & Pants: Affix to the inside tag on the waist (usually back center).

Head Wear: (i.e., all except hats with bills) Affix a hang tag through the inside tag or through the seam at the back of the item.

Packs: (i.e., day packs, backpacks and briefcase styles.) Affix a hang tag through the seam of the front zipper for day and backpack styles. Affix a hang tag around the shoulder strap for briefcase styles.

Sunglasses: Attach hang tag to the temple of the glasses.
